Green library

From Wikipedia, the free encyclopedia

This article is about sustainable libraries. For the library at Stanford University, see [Green Library](#).

This article **possibly contains original research**. Please **improve it by verifying the claims made and adding inline citations**. Statements consisting only of original research should be removed. *(June 2011)* ([Learn how and when to remove this template message](#))

A **green library** is designed to minimize negative impact on the natural environment and maximize indoor environmental quality by means of careful site selection, use of natural construction materials and biodegradable products, conservation of resources (water, energy, paper), and responsible waste disposal (recycling, etc.). In new construction and library renovation, sustainability is increasingly achieved through **Leadership in Energy and Environmental Design (LEED)** certification, a rating system developed and administered by the **U.S. Green Building Council (USGBC)**.^[1]

Green libraries are a part of the larger **green building** movement. Also known as sustainable libraries, green libraries are being built all over the world^[*citation needed*], with many high profile projects bringing the concept into the mainstream. Along with **library 2.0**, **green design** is an emerging trend, defining the **library** of the 21st century. Many view the library as having a unique role in the green building movement due to its **altruistic** mission, public

National Library, Singapore

Green Library - définition

Les Bibliothèques vertes sont « *conçues pour*

- *minimiser l'impact négatif sur l'environnement naturel et*
- *maximiser la qualité environnementale à l'intérieur de l'établissement, par*
 - *le biais d'un choix précis du site,*
 - *l'utilisation de matériaux de construction naturels et de produits biodégradables,*
 - *la préservation des ressources (eau, énergie, papier) et*
 - *le traitement responsable des déchets (recyclage, etc.) ».*

[Online Dictionary for Library and Information Science](#) (ODLIS)

“The Green library movement”

An overview of green library literature and actions from 1979 to the future of green libraries

by Monika Antonelli, Minnesota State University – Mankato, USA

Issue 27
Fall 2008

https://green.nd.edu/assets/24828/escholarship_uc_item_39d3v236.pdf

“Constructing a **green library building** using a performance standard like LEED* is a way some libraries are choosing to become green and sustainable. Environmental challenges like energy depletion and climate change will influence the **type of information resources** and **programs** libraries will provide to their communities.”

*LEED = *Leadership in Energy and Environmental Design*, American but most widely used green building rating system in the world.

Why libraries?

“The consideration of the role of humanity in climate change and the notion of sustainable development are core concerns of society, and consequently of libraries.”

ENSULIB (IFLA)

What is a Green Library?

“ *The consideration of the role of humanity in climate change and the notion of sustainable development are core concerns of society, and consequently of libraries.*”

According to the [Online Dictionary for Library and Information Science \(ODLIS\)](#), *Green Libraries* are “designed to minimize negative impact on the natural environment and maximize indoor environmental quality by means of careful site selection, use of natural construction materials and

Objectives of the IFLA Green Library Award

- * To reward the best Green Library submission that communicates the library's commitment to environmental sustainability
- * To create awareness of libraries' social responsibility and leadership in environmental education. Libraries of all types are encouraged to participate
- * To support the worldwide Green Library movement, concerned with
 - * environmentally sustainable buildings
 - * environmentally sustainable information resources and programming
 - * conservation of resources and energy
- * To promote the development of Green Libraries initiatives locally and worldwide
- * To encourage Green Libraries to actively present their activities to an international audience

Relevance to IFLA's goals and values

Following the **IFLA Statement on Libraries and Sustainable Development**, the award will help to advance the profession through illuminating the role of libraries and librarians in the advancement of sustainability standards and the promotion of specialized knowledge within professional practice.

Ideas

The Library:

- reacts on new forms of learning and the need for meeting spaces in a digital society
- connects the idea of green and sustainable libraries with social and political developments by providing new services
- considers Urban Gardening as an expression for the needs of the digital society – DIY, Maker, new public spaces, low-intensive meeting places

<https://www.flickr.com/photos/gartendeck/17227552396/sizes/z/> (Copyright: Gartendeck Hamburg)

- “Ernte deine Stadt – Harvest Your City: Three Years of Green and Sustainable Library Commitment in the Stadtbibliothek Bad Oldesloe”
- The local foodsharing-group offered their ,rescued food‘ from the local market.

Reviewer:

“ The library is a lighthouse in its region, creating a proactive and interactive space where citizens are the protagonists of a wide variety of activities to promote sustainability.”

Lviv Regional Children`s Library

The ECOeducation project serves children 4–10 years old, as well as their parents and teachers. In the duration of the project, they held 38 events with 971 participants (children and adults).
